Core Java Machine Test

Batch: Oct-25 to Dec-25

Date : 23/02/2026

Time : 08 to 10.30 Am.

Instructions:

1. Solve any 7 questions.
2. Input should be from user.
3. Indentation and comments mandatory.
4. Without using any inbuilt functions.

Q1. Write a java program to find the frequency of each digit in a given integer number.

Q2. Write a java program to display 1 to nth Strong Number.

Q3. Write a java program to check Number Is Prime Number or Not prime using function recursion.

Q4. Write a java program to print this pattern.

```

          *
        * * *
      *   *   *
    *     *     *
  *       *       *
*         *         *
  *       *       *
    *     *     *
      *   *   *
        * * *
          *
```

Q5. Write a java program to print this pattern.

```

1                                     1
1   2                               2   1
1   2   3                           3   2   1
1   2   3   4                       4   3   2   1
1   2   3   4   5   5   4   3   2   1
```

Q6. Write a java program to find the union array of two unsorted arrays.

Input :- arr1 = [1, 2, 3]

arr2 = [2, 3, 4, 5]

Output :- Union- [1, 2, 3, 4, 5]

Intersection- [2, 3]

Q7. Write a program in java to find the maximum for each and every contiguous subarray of size k from a given array.

Expected Output:

The given array is:

1 3 6 21 4 9 12 3 16 10

The length of each subarray is: 4

The contagious subarray of length 4 and their maximum value are:

1 3 6 21 ----> 21

3 6 21 4 ----> 21

6 21 4 9 ----> 21

21 4 9 12 ----> 21

4 9 12 3 ----> 12

9 12 3 16 ----> 16

12 3 16 10 ----> 16

**Q8. Write a java program to take input array from user and perform operations in array.
Store only prime number at the same index of digit.**

Input :- 5732 8659 2534 9625 7354 1325

Output :- 2573 5 253 25 357 235

-----ALL THE BEST-----
